

## **Rebuttal – Group 10**

### **For reviewer2:**

As for the comment about position of chart, it can be true in some way. Because we usually mention some of tables and figure repeatedly, the text about our chart appears anywhere, looking messy. We cannot avoid this except put them all to the bottom of the report as your said. Or you can click the “table” or “figure” in the text then the pdf turns to the corresponding page.
