

We humbly accept every criticism. As a writer of the first two parts, I did not strictly use vocabulary and pay too much attention to our original work due to the lack of experience in copying papers, This is my negligence, and I will correct it in future, but one of the purposes of our report is also to present the original paper in detail, so it is inevitable to write the report a bit of lengthy, we will discuss this problem further later, and we will pay more attention to present our original results and avoid excessive references to the original paper.
